TIPS AND TRICKS

BEGINNER'S GUIDE AND WALKTHROUGH

PART 1: JILL’S ROOM

JILL'S ROOM

At the point when you wake up, head kept separate from the room and into the kitchen. There's nothing to get, so simply walk. Head into washroom spot on of the ice chest, and mood killer the spigot.

At the point when you wake up once more, turn on the light — the switch is the red catch on the divider to one side of the work area. Look at Jill's Report and the Investigation Notes stuck to the scheme board, the Unsealed Envelope on the dresser to one side, and the Message from a Colleague in the kitchen on the table by the pizza.

Head once more into the restroom, turn on the light, and mood killer the spigot once more. Back in the primary room, get the ringing telephone (this is known as a "land line").

We won't walk you through the following part. There's nothing to get so simply ward running off.

OBJECTIVE: GET OUT OF TOWN

You'll recapture control down in the city. Follow Brad toward the film.

Follow the way to one side, and (after a fast cutscene) avoid the zombies. Experience the entryways into the house/eatery. After another cutscene, you'll head out the secondary passage.

In the back street, you'll get the cop's G19 Handgun. Try not to squander your slugs on the zombies. Simply pivot and run.

Duck under the sign that falls, and follow the way toward the transport. Disregard the zombie that falls by you, and bring the left into another back street and through another entryway.

Watch the elderly person lock himself in the trailer, and head to the entryway in the furthest corner of the stacking dock. Get the Handgun Ammo from the barrel to one side of the entryway, and experience.

OBJECTIVE: GO TO THE ROOFTOP PARKING LOT
